Bangkok, Thailand

## EDUCATION

December 2016 - March 2019

**Bachelor of Computer Technology**

University of Information  
Technology Specialization  
Embedded System

## LANGUAGES

English

Burmese

## HOBBIES

Listening Music

Travel

Coding

Badminton

## SKILLS

### Languages

JavaScript

Java

Typescript

Python

HTML/Css

Sass

### Framework

Angular

Ionic

React

Vue

Spring Boot

Node js

Ofbiz ERP

Tailwind CSS

Bootstrap

### Technology and Tools

Git

Docker

AWS

Jenkins

Protractor

Server Less

## Experience

Blue Stone  
Bluestone

**Senior Software Developer (Unit Leader)**

March 2023 - Now

**Tech Stack: Angular, Vue, Java, Ionic, Spring Boot, React, Nodejs**

- Led a high-performing project team in the insurance core project, overseeing the successful implementation of complex functionalities such as configuration product of insurance policy and policy rule configuration.
- Spearheaded the development of innovative solutions, enabling customization of field and policy settings without the need for code changes, enhancing the product's flexibility and scalability.
- Developed a mobile application using Vue and Ionic for a project focused on reducing plastic waste, showcasing proficiency in cross-platform app development and user interface design.
- Designed and implemented RESTful APIs using Spring MVC, enhancing system interoperability and enabling seamless integration with front-end Angular applications.
- Collaborated closely with stakeholders to understand project requirements and translate them into technical solutions, ensuring alignment with business objectives.
- Mentored junior developers, fostering a collaborative and knowledge-sharing environment within the team.

## Experience

UpWork

### Freelancer

Jan 2022 – Feb 2023

**Tech Stack:** Angular, Vue, Java, Ionic, Spring Boot, Jenkin

- Developed customized websites and applications using a robust tech stack including Angular, HTML, CSS, JavaScript, Java, MySQL, and various APIs to meet clients' specific requirements.
- Demonstrated strong problem-solving skills by implementing UI based on design and data structure for a school management system and an appointment system for clinics, meeting the unique needs of each client.
- Utilized industry best practices to deliver high-quality solutions that met or exceeded client expectations, earning positive feedback and repeat business.

BingoWorld

### Associated Software Developer

Oct 2019 – Dec 2021

**Tech Stack:** Angular, Spring Boot, Nodejs, OFBiz ERP, HTML/CSS, JavaScript, TypeScript, Java

- Coordinated project planning and implementation across multiple teams, using the OFBiz ERP framework based on Java, Groovy, XML, HTML, and JavaScript.
- Significantly contributed to the enhancement and optimization of the account, e-commerce, customer, and reporting modules within the OFBiz ERP framework, resulting in a substantial improvement in the functionality and performance of the enterprise business applications.
- Established an attendance system with face recognition using AWS serverless technology, showcasing proficiency in AWS services and serverless architecture.
- Developed a serverless AWS backend and utilized Ionic for the mobile app frontend, seamlessly integrating the Angular web application to create a comprehensive and efficient solution.
- Implemented a vehicle management system that enabled real-time vehicle tracking on a map using Leaflet Map, enhancing operational efficiency and tracking capabilities.
- Provided software training to team members, designed software UI, and contributed to the architecture of software projects, ensuring high-quality deliverables.

BingoWorld

### Junior Software Developer

May 2019 – Oct 2019

**Tech Stack:** HTML/CSS, JavaScript, Angular, Spring Boot, Adobe Xd

- Demonstrated proficiency in a diverse tech stack, including HTML/CSS, JavaScript, Angular, Spring Boot, and Adobe XD, showcasing versatility and adaptability in learning new technologies.
- Managed the development of a comprehensive salon management system, encompassing appointment scheduling, client management, and inventory management functionalities.
- Gained hands-on experience in software development practices and methodologies, contributing to the overall success of the project and enhancing skills in application development and design.

## Personal Projects

### Crypto Project

- **Description:** Connected a regular React.js application to the blockchain and paired it with an Ethereum wallet using MetaMask. Learned how to write Smart Contracts on the Ethereum network using the Solidity programming language. Created a full-fledged Web 3.0 application that allows users to send transactions through the blockchain.
- **Tech Stack:** React.js, MetaMask, Ethereum, Solidity

### AWS Serverless Image Recognition

- **Description:** Developed an image recognition program using AWS serverless technology. The program can analyze images and recognize objects or patterns.
- **Tech Stack:** Node.js and AWS Serverless

### Ecommerce

- **Description:** Created an ecommerce platform with a backend in Node.js. The platform supports online shopping and payment processing.
- **Tech Stack:** Node.js

### Book App

- **Description:** Built a book application with a frontend in Ionic. The application allows users to search for books, view details, and manage their reading list.
- **Tech Stack:** Ionic
